Status of the Claims

1. Claims 1-35 are pending in this application. The examiner withdraws the Final Office Action mailed on 1/29/2003 due to the Quality Assurance Specialist's advices.

Drawings

2. This application has been filed with 36 sheets of drawings which currently are acceptable for examining purposes.

Election/Restrictions

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:

The examiner regrets for the delay to response because there was a long review time; in page 4, para. 2 of the Appeal Brief (received on 4/28/2003), the applicants assert that there are at least 2 different species in this invention; however, this application contains claims directed to the following 6 patentably distinct species of the claimed invention:

- Species 1: A processor resolves 1st identity data by identifying the merchant based on the merchant's captured image and manual inputs.
- Species 2: A processor resolves 2nd identity data by merchant's voice and manual inputs.
- Species 3: A processor uses both merchant's captured image and merchant's voice without manual inputs (i.e., PINs/password).
- Species 4: A processor uses both merchant's captured image and merchant's voice with manual inputs (i.e., PINs/password).

- Species 5: A processor uses merchant's captured image without needing manual inputs for identification (i.e., PINs/password).

Species 6: A processor uses merchant's voice without needing PIN inputs for identification (i.e., PINs/password).

Applicants are required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Applicants are advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicants will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. A telephone call was made to Mr. Ralph E. Jocke on 4/13/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

5. Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Should applicants traverse on the ground that the species are not patentably distinct, applicants should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Note: Mpep § 1.142 Requirement for restriction.

(a) If two or more independent and distinct inventions are claimed in a single application, the examiner in an Office action will require the applicant in the reply to that action to elect an invention to which the claims will be restricted, this official action being called a requirement for restriction (also known as a requirement for division). Such requirement will normally be made before any action on the merits; however, it may be made at any time before final action.

(b) Claims to the invention or inventions not elected, if not canceled, are nevertheless withdrawn from further

consideration by the examiner by the election, subject however to reinstatement in the event the requirement for restriction is withdrawn or overruled.

[Para (a) revised, 62 FR 53131, Oct. 10, 1997, effective Dec. 1, 1997

MPEP 811.02 said: Even After Compliance With Preceding Requirement Since 37 CFR 1.142(a) provides that restriction is proper at any stage of prosecution up to final action (with the current withdrawal of the pending Final Office Action, this restriction is proper), a second requirement may be made when it becomes proper, even though there was a prior requirement with which applicant complied. Ex parte Benke, 1904 C.D. 63, 108 O.G. 1588 (Comm'r Pat. 1904).

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to CUONG H. NGUYEN whose number is 703-305-4553. The examiner can normally be reached on 7am-3:30 pm.
